SUMMARY

With experience as a software development trainee and NodeJS intern, I am a software developer with honed skills in JavaScript, React, Redux, and Ruby on Rails, and am committed to continuous learning in a dynamic environment. Mindful of the crucial value of teamwork, I prioritize collaboration and effective communication. I am results-driven and committed to delivering high-quality outcomes.

SKILLS

Front-end: JavaScript, React, Redux, HTML5, CSS3, Bootstrap.
Back-end: Node.js, Express.js, Ruby on Rails, MySQL, PostgreSQL.
Tools & Methods: Git, GitHub, Responsive Design, Postman, Webpack, Figma, Jest, Rspec, Netlify.
Professional: Remote Pair-Programming, Teamwork, Mentoring, Cross-cultural Communication.

EXPERIENCE

HIGHLIGHTED PERSONAL PROJECTS   Remote
Full Stack Web Development Student   JUL, 2022 – Present

Mastered intermediate to advanced topics like responsive web design, performance optimization, and building scalable web applications. I developed 30+ web applications, collaborated with 100+ remote developers through GitHub, reviewed 80+ pull requests, and used Agile management methods like Kanban.

Private Investigators — Private Investigators offers users a seamless way to book appointments with licensed investigators by having a responsive design and incorporating authentication rules.
- **Built with:** React.js, Redux, Ruby on Rails, and Bootstrap.
- **To view** it on GitHub, click here.

Every Cent — Every Cent is an easy-to-use app that simplifies expense tracking. Users can categorize expenses, track spending effortlessly with its simple and responsive interface, and achieve complete financial control on the go!
- **Built with:** Ruby on Rails and CSS.
- **To view** it on GitHub, click here.

Meal Mentor — A user-friendly web app that simplifies meal planning and cooking. Browse through a variety of recipes, share thoughts and suggestions, and enjoy hassle-free cooking with a delightful interface.
- **Built with:** HTML, CSS, JavaScript, Webpack, Foods API, and Jest.
- **To view** the live demo, click here.

MICROVERSE   Remote
Peer Mentor (Volunteer)   SEP, 2022 – Present
- Mentoring 3 developers by providing technical support and professional development feedback.
- Suggesting enhancements to the structural arrangement of code to enhance quality and performance.
- Offering strategies for sustaining motivation in order to achieve long-term success within the program.

RAZI INSTITUTE OF HIGHER EDUCATION   Kabul, Afghanistan
Computer Lecturer   APR, 2022 – DEC, 2022
- Developed an innovative curriculum for the computer skills course, incorporating the latest trends and technologies in the field.
- Attained a remarkable 95% satisfaction rate from students by delivering captivating lectures, fostering interactivity, and giving constructive feedback.
- Improved the overall pass rate for the computer course from 70% to 90% through effective test preparation and implementation strategies.
- Conducted research on the integration of technology in medical education.

THE ONE TECHNOLOGIES
Software Development Trainee

Ahmedabad, India
FEB, 2021 – JUL, 2021

- Acquired diverse expertise in crucial aspects of software development, such as computer programming, UI design, version control, and software testing at a remarkable pace.
- Skillfully applied UI design abilities to deliver successful projects that showcased an adept understanding of design principles and user experience.
- Demonstrated proficiency in manual and automated software testing, resulting in premium software products with optimized performance.

ASTERISM INFOSOFT
NodeJS Intern

Gandhinagar, India
SEP, 2020 – DEC, 2020

- Created seamless integration of APIs into a liquor delivery app, resulting in a hassle-free user experience.
- Showcased advanced skills in creating scalable, real-time applications by implementing features similar to those found in popular apps like Netflix and Uber.
- Worked alongside senior developers and stakeholders to resolve intricate issues while delivering high-quality results within tight schedules.

EDUCATION

MICROVERSE
Remote Full Stack Web Development Program, Full Time

JUL, 2022 – APR, 2023

- Dedicated over 1300 hours to mastering a diverse set of skills including algorithms, data structures, and full-stack development. Simultaneously applied these skills to develop multiple projects utilizing Ruby, Rails, JavaScript, React, and Redux.
- Participated in numerous coding pair programming sessions, where I gained hands-on experience working on real-world coding projects.
- Demonstrated strong teamwork and collaboration skills, working with other students from diverse backgrounds and skill levels to achieve shared coding goals.

GUJARAT TECHNOLOGICAL UNIVERSITY
Bachelor of Computer Engineering

AUG, 2017 – JUL, 2021

- Graduated with distinction, maintaining a high academic standing throughout the program.
- Completed numerous projects and coursework in software development, computer networks, and database management systems.
- Collaborated with a team of students to design and develop a fully functional university management system as a final-year project.
